AVAZONE · WALL OF FRAMES

App Flow Guide

How the recognition platform works — who can do what, where everything lives, and each journey step by step.

FOR
Everyone at AvadheshCo

VERSION
1.2 · October 2026

APP
Next.js · JavaScript (JSX)

Wall of Frames in one minute

A place to say thank you at work. People recognise each other with points and badges, climb levels, and spend points on rewards. Managers look after their teams; HR runs the programme; Super Admins decide who can do what.

👏

Recognise

Pick a person, a value and a short message. Add photos or a badge if you like. Points are added automatically.

🏅

Grow

Points received add up to a level: Bronze → Silver → Gold → Platinum. Badges celebrate specific kinds of great work.

🎁

Reward

Spend points on time off, learning, experiences and more. HR or the Super Admin decides; declines are refunded.

Two kinds of points. **Balance** is what you can spend. **Lifetime** is everything you have ever received and decides your level — spending never lowers your level. Separately, everyone gets a **monthly giving budget** to hand out. **How many points** each thank-you, birthday, anniversary and welcome is worth is decided by the **Super Admin**.

Made to be easy. A getting-started checklist on Home, a “?” on every page that explains it in plain words, a Recognize sheet that tells you the next step, Undo after most actions, and a phone-style tab bar on mobile.

Who can do what

Roles are sets of permission switches, so admins can create new roles (like Team Lead) without any code. The app only ever checks permissions — never role names.

Employee
Everyone

- Recognise colleagues and send points
- Comment and applaud
- Redeem rewards
- See badges, people and the leaderboard

Manager
Leads a team

- Everything an Employee can do
- My Team: see who is quiet
- Nudge quiet teammates (once a week)
- Award badges

Team Lead
Example custom role

- Everything an Employee can do
- See their team
- Award badges
- No nudges — chosen by the admin

HR Admin
Runs the programme

- Edit every person's details
- Decide reward requests
- Levels, Badge Studio, moderation
- Announcements, analytics, audit log

Super Admin
Full control

- Everything HR can do
- Points Rules: decides all amounts
- Give or take bonus points
- Roles, permissions, settings

Guard rails: Super Admin always keeps every permission · nobody can change their own role or remove their own "Manage roles" · HR can edit everyone except the Super Admin · only the Super Admin can change point amounts · every change is written to the Audit Log.

Where everything lives

The sidebar only shows what your role can use. On phones, the five most-used places sit in a tab bar at the bottom, with the rest under More.

Audit Log
Who changed what

Anywhere

⌘K Search
People, pages, actions

⌘J Recognize
Opens the Recognize sheet

? Help
Explains the page

Your first day

New people are guided from the first screen. Each checklist item ticks itself off when you actually do it.

1
Employee
Sign in
Use your work email and the temporary password HR shared.

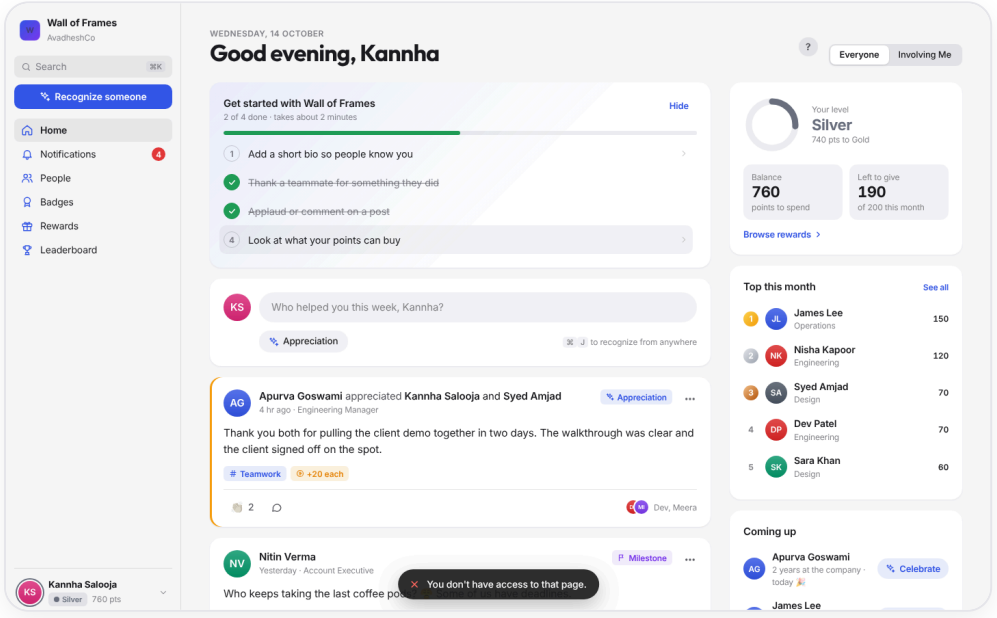

2
Employee
Land on Home
A greeting, your level card and a 4-step checklist.

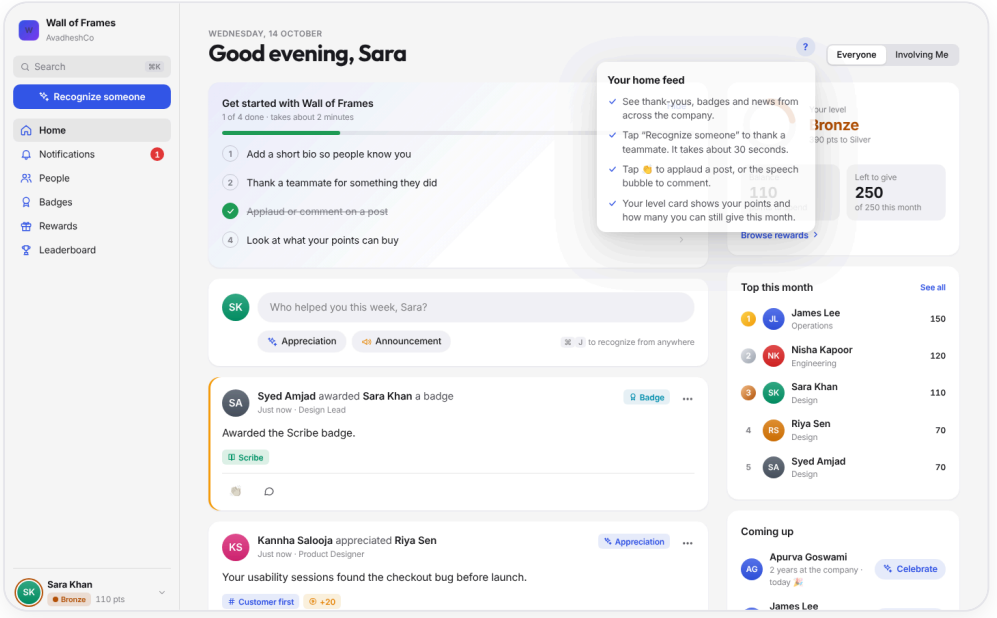

3
Employee
Add a bio
Settings → Profile. Takes 20 seconds.

4
Employee
Thank someone
The checklist opens the Recognize sheet for you.

5
Employee
Applaud a post
Tap 👏 on anything in the feed.

6
Employee
Peek at Rewards
See what points can buy. Checklist complete.

Left: Home with the checklist and level card. Right: the "?" help explains the page in plain words.

Recognising someone

The core action. The sheet numbers each step and the footer always says what's next, so nobody gets stuck.

1 — Employee

Open Recognize

Sidebar button, ⌘J, the + tab on phones, or "Recognize" on a profile.

2 — Employee

1 · Who

Type a name. Several people at once is fine.

3 — Employee

2 · Which value

Teamwork, Ownership, Customer first...

4 — Employee

3 · Say thanks

A sentence on what they did and why it mattered.

5 — Employee

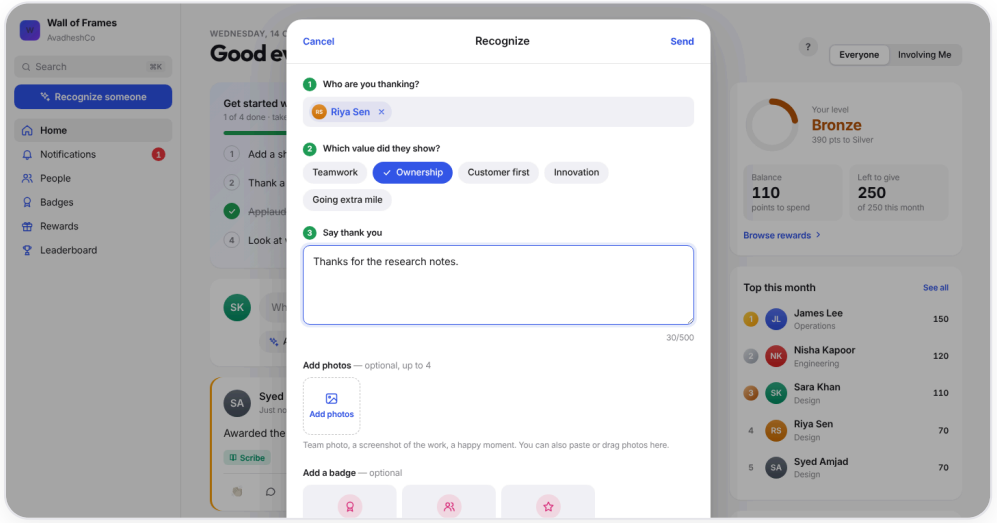

Extras

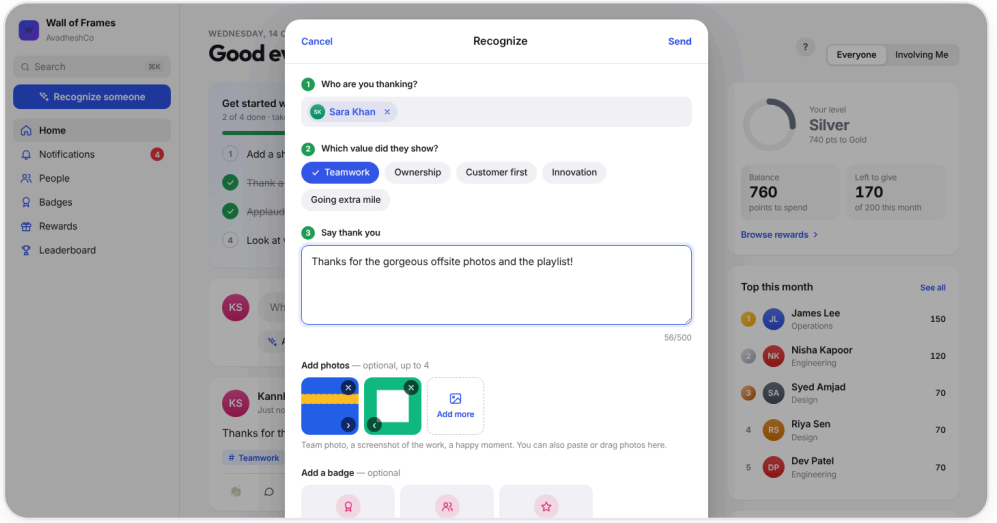

Optional photos (up to 4) and a badge. Points are added automatically.

6 — System

Send

Confetti, post in the feed, points to the recipients, notification sent. Undo for 2 minutes.

Budget check
The Super Admin's points × people must fit what you have left this month; the sheet explains if it doesn't.

No self-thanks
Unless Company Settings allow it.

Badges
Everyone can attach Culture badges; managers can attach any badge.

Points, budgets and levels

Every point movement is recorded in a ledger, so any balance can be explained line by line.

Points come in

- + Appreciations you receive
- + Badges you are awarded
- + Automatic bonuses: welcome, birthday, anniversary
- + Bonus points from the Super Admin
- + Refunds of declined rewards

Balance
what you can spend

Lifetime
decides your level

Points go out

- − Rewards you redeem

Lifetime never goes down

Bronze
from 0
Welcome kit

Silver
from 500
Monthly coffee voucher

Gold
from 1,500
+1 learning day / quarter

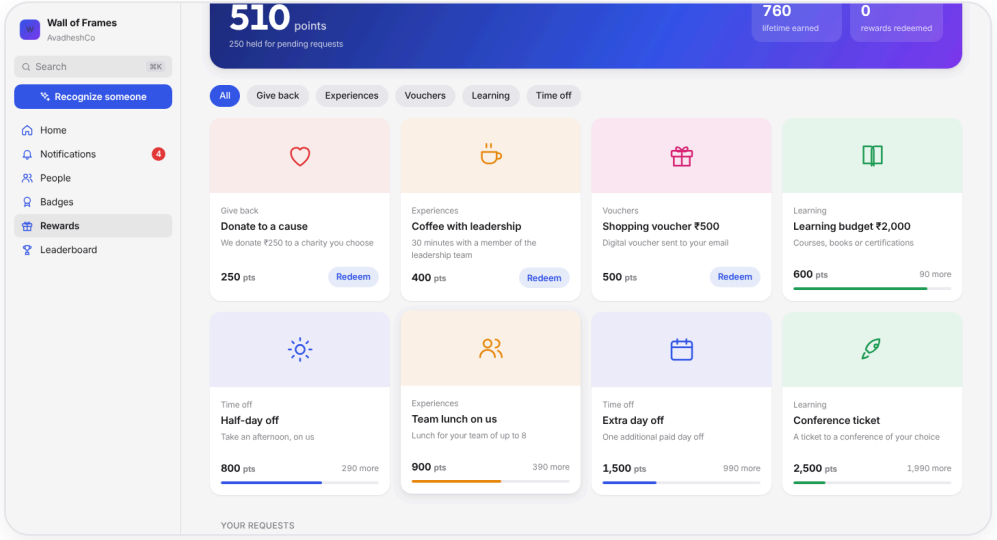

Platinum
from 3,000
Lunch with leadership + day off

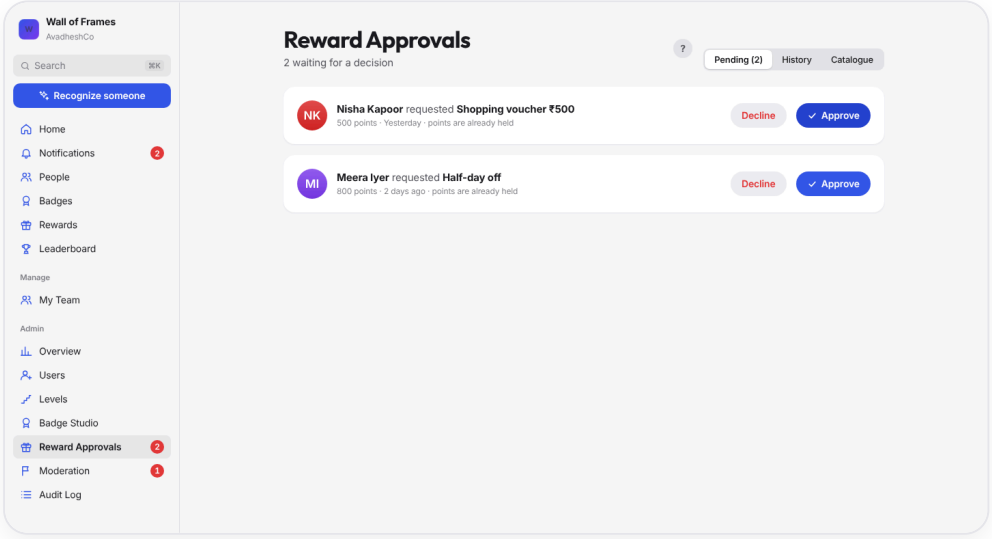

HR can change the thresholds and perks in Admin → Levels and sees a live preview of how many people land in each level before saving. The monthly giving budget is separate: it resets on the 1st and is set by the Super Admin in Points Rules.

Redeeming a reward

Points are held, not spent, until HR or the Super Admin decides — so nothing is lost if a request is declined or cancelled.

Employee	**Picks a reward** Only affordable ones show Redeem	**Confirms** Points are held	**Waiting for a decision**	**Can cancel** Points return instantly
HR / Super Admin	**Notified** "Needs you" card on Home	**Reward Approvals** Pending tab	**Approve**	**Decline + note**
System	**Notifies the employee**	**Approved: points stay spent**	**Declined: points refunded**	**Decision in Audit Log**

Badges: from idea to profile

HR and Super Admins design badges in Badge Studio. Managers award them. People who earn a badge keep it forever, even if it is retired later.

1

HR Admin

Design in Badge Studio

Name, one-line description, how to earn it, icon, colour, points. Live preview.

2

System

Live everywhere

Appears in the Badges directory and the Recognize sheet immediately.

3

Manager

Award

From a profile, from the badge's own sheet, or attached to a thank-you.

4

System

Celebrate

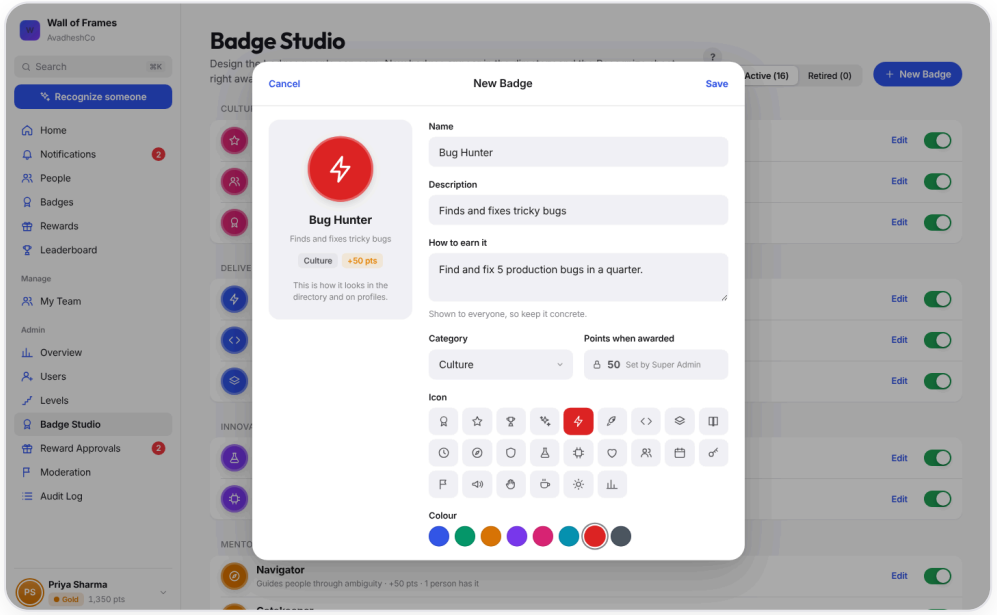

Badge post in the feed, points added, person notified.

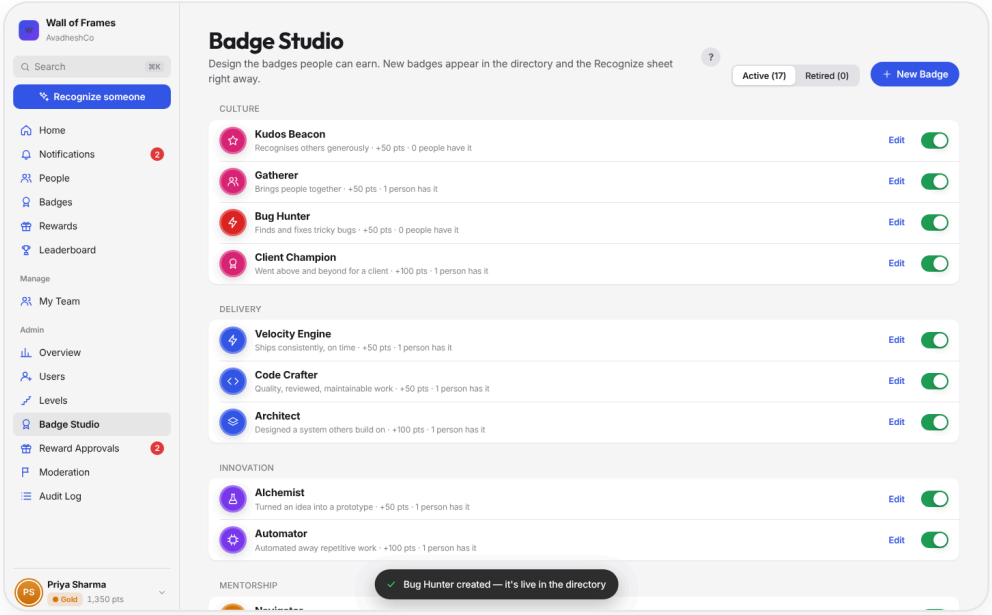

5

HR Admin

Retire when needed

Hidden from pickers; holders keep it. Delete only if no one has it.

Automatic points: the Super Admin decides

Nobody types a points amount. The Super Admin sets the rules once in Admin → Points Rules, and the app gives points out by itself — on the day, once, and with a record in the ledger.

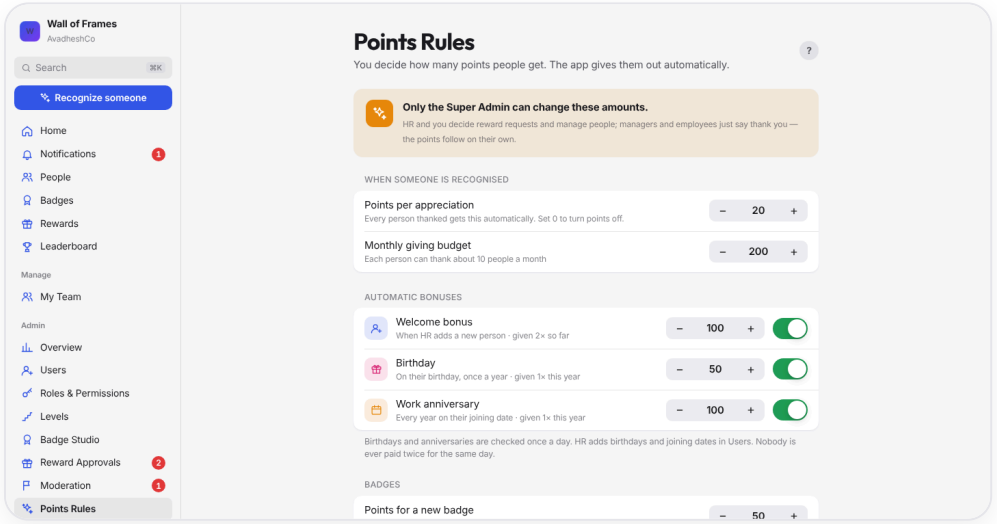

1
Super Admin
Set the amounts
Points per appreciation, monthly giving budget, points for a new badge.

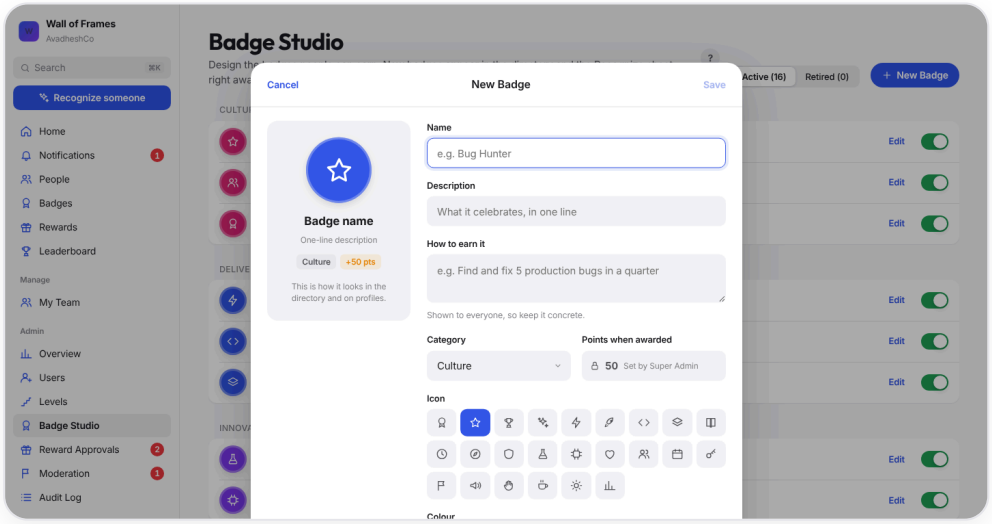

2
Super Admin
Switch bonuses on
Welcome bonus, birthday and work anniversary — each with its own amount.

3
System
Thank-yous
Every person thanked gets the set amount automatically.

4
System
Daily check
Birthdays and anniversaries are paid on the day. Never twice.

5
Employee
Gets notified
“Happy birthday! +50 points” — visible in their points history.

Only the Super Admin
“Set point rules” can’t be switched on for any other role, not even HR.

HR sees, can’t change
In Badge Studio, HR sees a badge’s points as “Set by Super Admin”.

Bonus points
The Super Admin can give or take points from a person’s Edit sheet, always with a reason.

Editing people: HR and the Super Admin

Everything about a person lives in one Edit sheet. HR can edit everyone except the Super Admin; every change is written to the Audit Log.

1 — HR Admin

Open Users

Search or filter by role. Tap Edit on the person's row.

2 — HR Admin

Change details

Name, email, job title, employee ID, phone, city.

3 — HR Admin

Work & birthday

Role, department, manager, joining date, birthday (day and month only).

4 — System

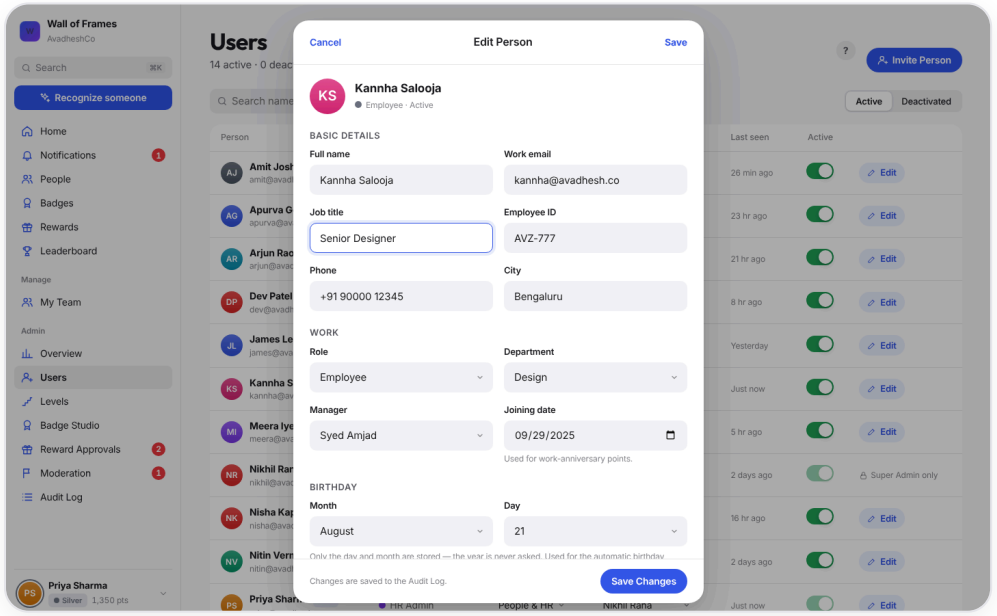

Save

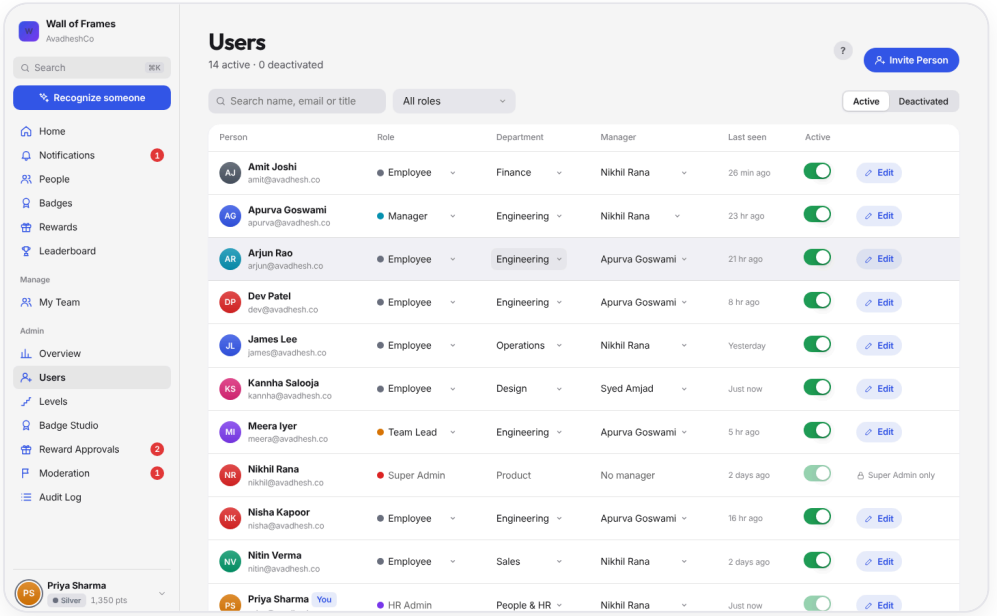

Checked on the server, saved, and logged: "Edited details: phone, birthday".

5 — System

Feeds automation

Birthday and joining date drive the automatic bonuses.

Left: HR editing a person — the points box is read-only for HR. Right: the Super Admin row is locked for HR ("Super Admin only").

Photos in posts

A thank-you lands better with a picture. Appreciations and announcements can carry up to four photos.

1

Employee

Add photos

Tap Add photos, paste, or drag them onto the Recognize sheet.

2

System

Made light

Big photos are resized in the browser; only real images are accepted (max 5 MB).

3

Employee

Arrange

Reorder with ‹ › or remove with ×. Up to 4.

4

System

In the feed

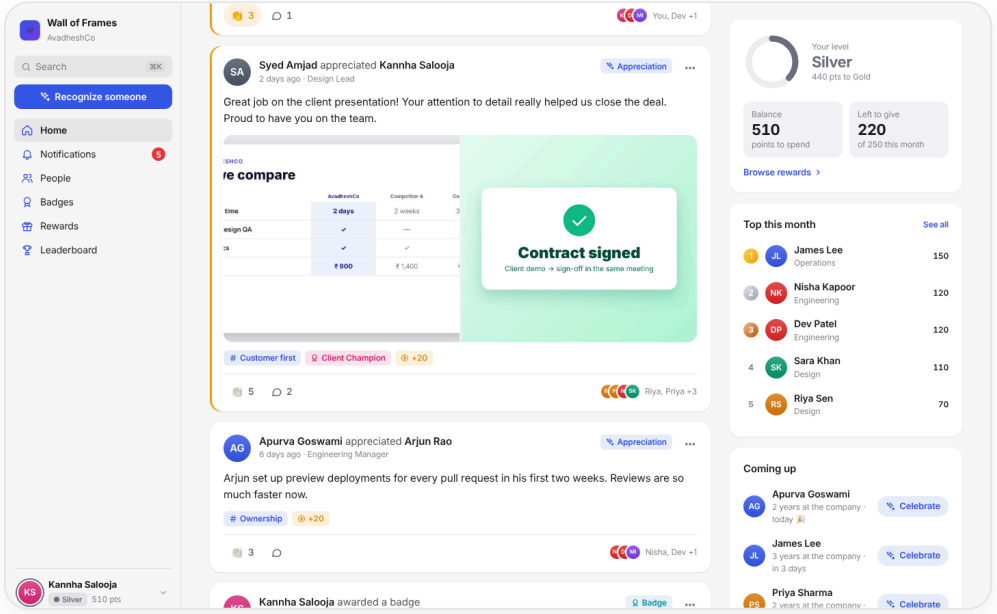

1, 2, 3 or 4-photo layouts. Tap to view full screen, use ← → to browse.

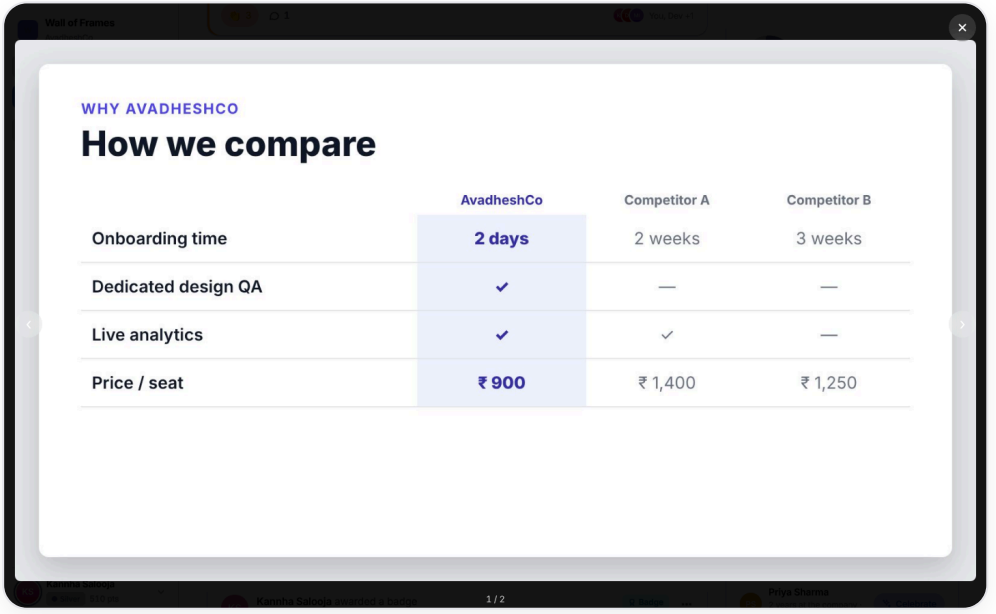

5

System

Private & tidy

Only signed-in colleagues can open photos. Undo or delete removes them.

Managers looking after their team

My Team shows, for each direct report, what they gave and received in the last 30 days — so quiet people get noticed.

1

Manager

Open My Team

Or tap the “quiet teammates” item in the Needs-you card on Home.

2

Manager

Spot who’s quiet

Quiet = hasn’t thanked anyone this month. New joiners are tagged.

3

Manager

Nudge

A friendly reminder, at most once a week per person.

4

Employee

Gets the nudge

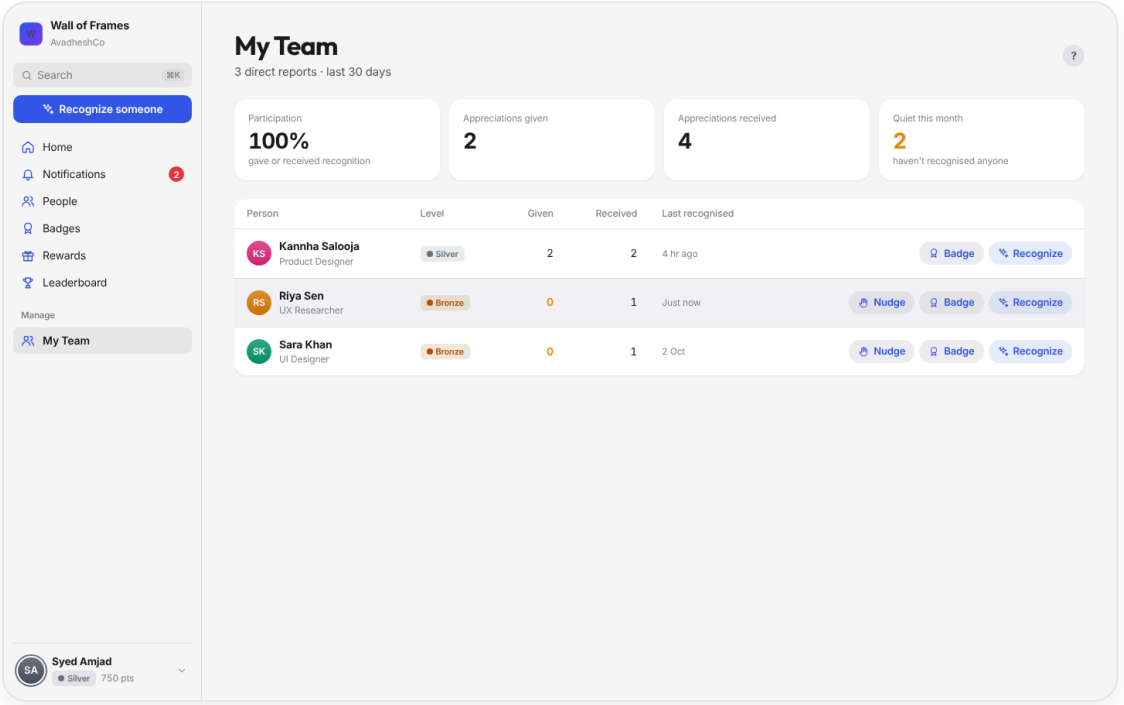

Notification opens the Recognize sheet directly.

5

Manager

Recognise or award

Right from the same row.

Creating a role and giving access

Super Admins shape access with switches. Changes save instantly, can be undone, and apply the next time each person opens a page.

1 — Super Admin

New Role

Name it and start from an existing role's permissions, or from nothing.

2 — Super Admin

Flip switches

Grouped as Recognition, People, Administration. Undo on every change.

3 — Super Admin

Compare

See every role side by side in a matrix.

4 — HR Admin

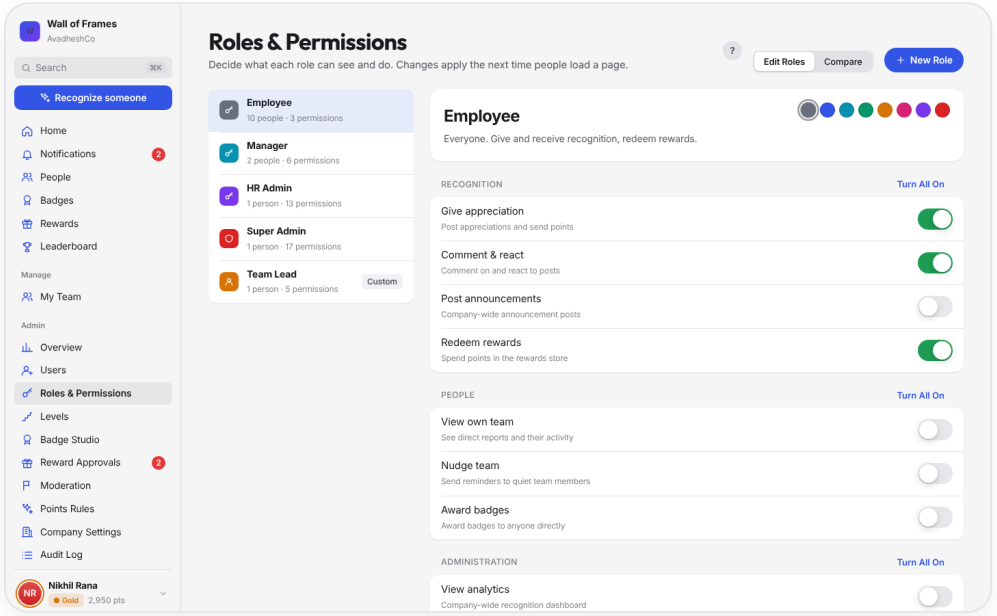

Assign people

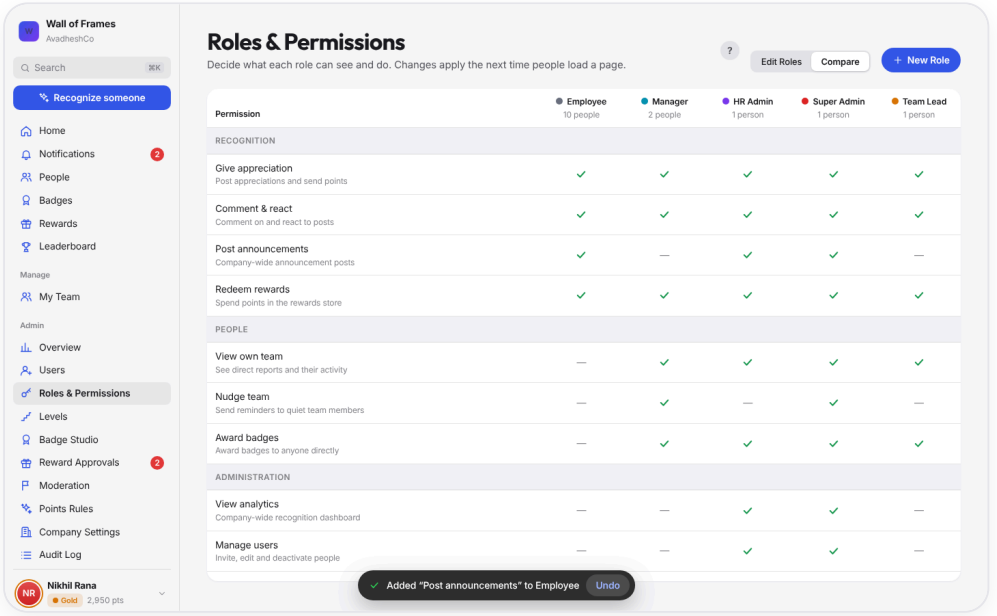

Users → pick the role in the person's row.

5 — System

Takes effect

Their sidebar and pages update on next load. Logged in the Audit Log.

Moderation and the permission matrix

Anyone can report a post. Moderators decide, and every decision can be reversed.

1

Employee

Report

Post menu → Report... and pick a reason. Reporter stays anonymous.

2

System

Notify moderators

Shows in Moderation and the Needs-you card.

3

HR Admin

Keep or hide

Hide removes it from the feed for everyone.

4

HR Admin

Undo / restore

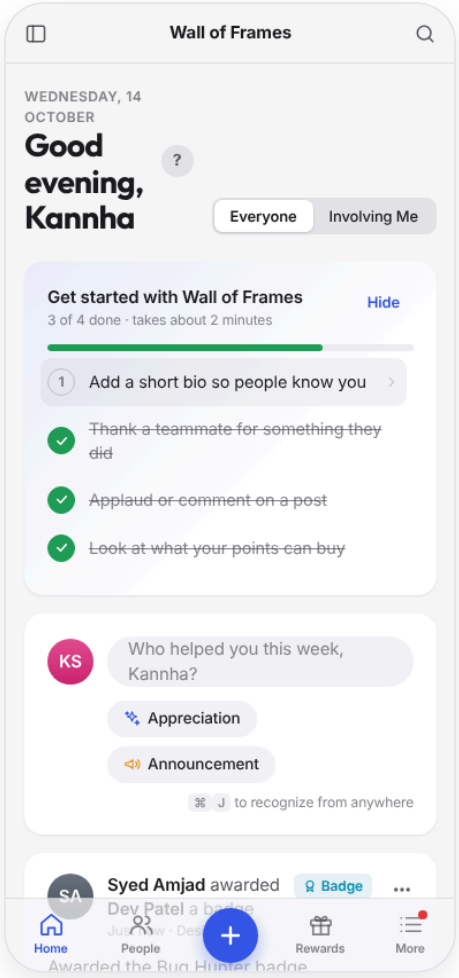

Hidden posts can be restored any time.

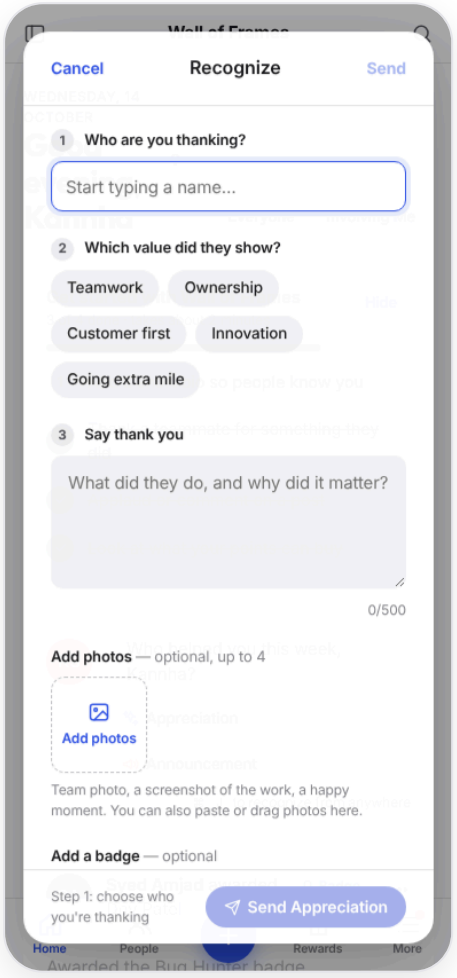

Permission	Employee	Manager	Team Lead	HR Admin	Super Admin
Give appreciation, comment, redeem	✓	✓	✓	✓	✓
Post announcements	—	—	—	✓	✓
View own team	—	✓	✓	✓	✓
Nudge team	—	✓	—	—	✓
Award badges	—	✓	✓	✓	✓
Create & edit badges (Badge Studio)	—	—	—	✓	✓
Edit people’s details (Users)	—	—	—	✓	✓

Set point amounts (Points Rules), give bonus points	—	—	—	—	✓
Roles & permissions, company settings	—	—	—	—	✓

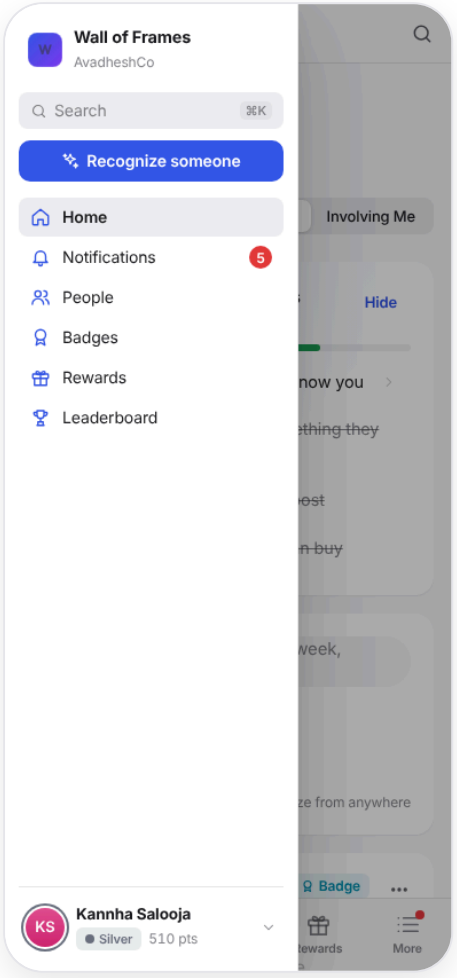

Default roles shown. Admins can change any of these switches (except Super Admin) or create new roles.

On phones, and getting help

The same app adapts to small screens. Help is always one tap away.

Tab bar
Home, People, Recognize (+), Rewards, More.

"?" on every page
Plain-language explanation of what the page does.

Keyboard
⌘K search · ⌘J recognize · ⌘↵ send · Esc close · ? shortcuts.

Appearance
Automatic, Light or Dark — applies instantly.

Undo
Thank-yous, permission changes, retiring badges and hiding posts.

Need access?
Settings → Your access lists what your role can do. Ask HR for more.
